Totals:	8	9

ROM Date: 4/8/2021

ROM Time: 12:14 PM

Length of ROM: 10h 58m

Fluid Color: Clear

Perinatal complications: none.

Birth information:

Date of birth:	4/8/2021
Time of birth:	11:12 PM
Sex:	male
Delivery type:	Vaginal, Spontaneous
Gestational Age:	38w1d

The image is a high-contrast, black-and-white graphic. It features a large, dark, irregular shape on the left side, characterized by a jagged, stepped edge that slopes downwards from left to right. The background is white. There are several thick, horizontal black bars of varying lengths positioned at the top, bottom, and center of the image. The top bar is a thick, solid black rectangle. Below it, on the left, is a dark shape with a stepped, jagged edge. In the center, there is a vertical column of black bars of decreasing height, resembling a histogram or a series of steps. At the bottom, there are two long, horizontal black bars: one on the left and one on the right, with a shorter bar in between them. The overall composition is abstract and geometric, with a focus on black shapes against a white background.

Objective

Vitals:

Temperature: 97.7 °F (36.5 °C)

Pulse: 120

Respirations: 30

Length: 19" (48.3 cm)(Filed from Delivery Summary)

Length: 15" (38.5 cm)(Filed from Delivery Summary)
Weight: 3175 g (7 lb)(Filed from Delivery Summary)
